

# THE INTERSECTION OF HEALTH POLICY & PHILANTHROPY

## FALL FORUM

- Health Care Transformed:  
Better Delivery for Those  
Most in Need
  - November 15–16, 2012
  - The Fairfax at Embassy Row
- 
- Transforming Health Care  
Delivery for High-Cost,  
High-Need Patients
  - Creating and Expanding  
Patient-Centered Medical Care

The background of the entire page is a photograph of an ornate, domed ceiling. The ceiling features a complex, repeating geometric pattern of squares and rectangles, each containing intricate designs in shades of gold, blue, and red. The overall appearance is that of a grand, classical architectural space, possibly a government building or a museum. The lighting is warm, highlighting the textures and colors of the ceiling's decorations.

# FALL FORUM 2012

---

Join Grantmakers In Health (GIH) in Washington, DC, for the 2012 Fall Forum to examine issues at the intersection of health policy and health philanthropy. This year, our focus is improving the delivery of health services, particularly for vulnerable patients. Top speakers will discuss innovative solutions for addressing their health care needs, successful efforts to transform the traditional safety net into a coordinated care system, and how these achievements can be applied more broadly. We will hear about challenges, but we will also meet funders and other stakeholders who are designing dynamic solutions for their communities.

# HEALTH CARE TRANSFORMED:

---

## BETTER DELIVERY FOR THOSE MOST IN NEED

Improving the quality of health care delivery is a hallmark of the Affordable Care Act (ACA). Provisions in the health care law encourage and support innovative approaches to transform the health care system to one that improves quality, increases access, eliminates waste, and reduces costs, particularly for those with multiple chronic conditions.

Whether you are already funding delivery system transformation or are interested in doing so, *Health Care Transformed: Better Delivery for Those Most in Need* is designed to inform your work. Discussion topics include:

- promising innovations in health care delivery models,
- necessary elements for creating a patient-centered medical home,
- payment reform, and
- the work of fellow funders supporting coordinated care efforts in their communities.

**The Fairfax at Embassy Row**  
2100 Massachusetts Ave. NW  
Washington, DC 20008

**Metro Station:**  
Dupont Circle

### THURSDAY, NOVEMBER 15

### FRIDAY, NOVEMBER 16

8:30 A.M.–9:00 A.M.	Continental Breakfast
9:00 A.M.–4:00 P.M.	Creating and Expanding Patient-Centered Medical Care

# AGENDA-AT-A-GLANCE

NOVEMBER 15–16, 2012

## THURSDAY

---

*Keynote Speaker: Jeffrey Brenner,  
Camden Coalition of Healthcare Providers*

---

The first day of the Fall Forum will focus on transforming care for high-cost, high-need patients. This relatively small share of patients—those with multiple chronic or complex conditions and those with needs that span the spectrum of behavioral, social, and medical care—account for a disproportionate share of health care costs, even though the outcomes of their care are not always commensurate with the costs. Can health care systems be transformed to better meet the needs of the neediest without increasing the cost burden? Promising experiences suggest that both better outcomes and cost savings for all are possible through a focus on high-cost, high-need patients.

## FRIDAY

---

*Keynote Speaker: Mitchell Katz,  
Los Angeles Department of Health Services*

---

The second day of the Fall Forum will focus on the creation and expansion of patient-centered medical care, especially within the safety net. Funders, providers, and field experts will discuss the ways in which the ACA is supporting the development and diffusion of patient-centered medical care; required elements to create and sustain health homes within primary care practices; issues surrounding payment reform and costs savings; the integration of behavioral and mental health services; evaluating patient experiences; and shared examples of successes in the field. Ample evidence exists to demonstrate the value and cost savings of patient-centered care—can the vision be turned into a reality?
