Social Impact Consultants

Discovering better ways  
to solve social problems

# Collective Impact in Health

*prepared for*  
**Grantmakers in Health**

April 2014

## Agenda for Today's Webinar

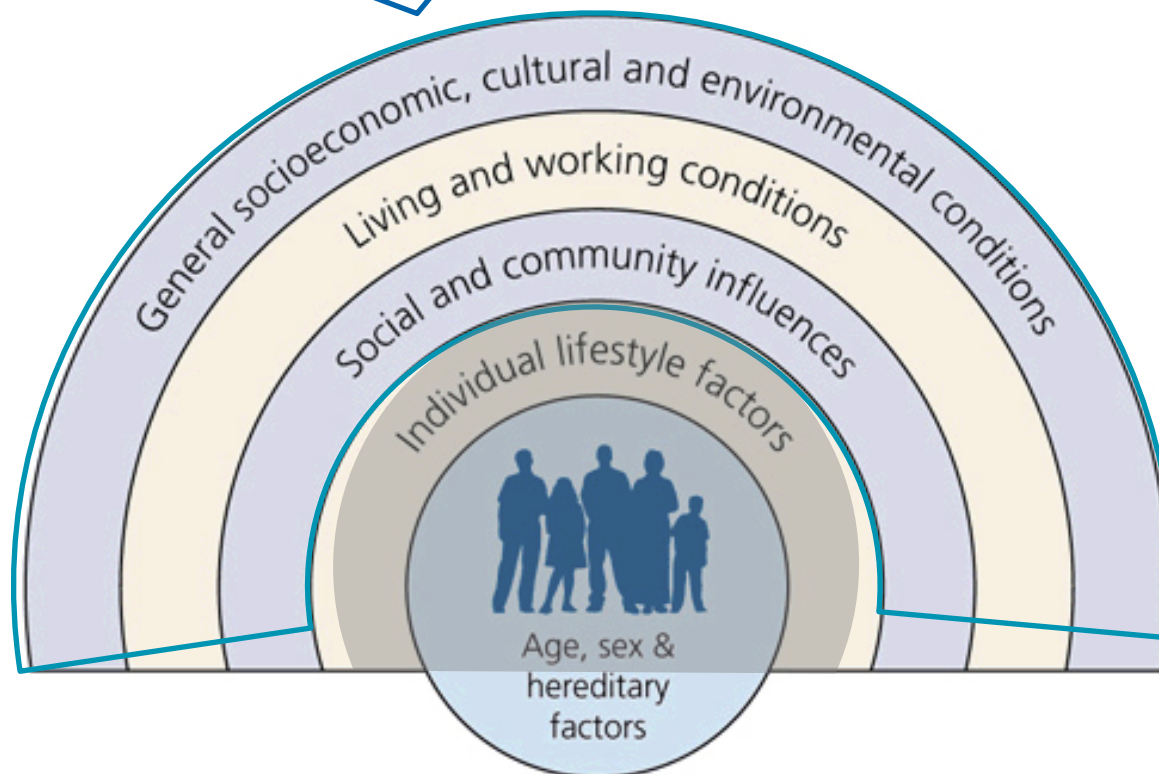

- ✓ **Collective Impact Overview**
- ✓ **The Role of Funders in Collective Impact**
- ✓ **Missouri Foundation for Health**
- ✓ **Questions and Answers**

# Collective Impact Overview

# The Use of Collective Impact to Improve Health Is Gaining Momentum, Largely Due to Increased Emphasis on the Social Determinants of Health

Collective Impact is a way that communities can organize themselves to improve system-level factors that influence social determinants of health

## Example Partners

- Public health departments
- Governments
- Doctors and hospitals
- Payers
- Non-profit organizations
- Pharmaceutical or medical device companies
- Employers
- Primary and secondary schools
- Medical professional associations
- Medical education providers
- Faith-based organizations
- Universities and researchers

## Five Conditions for Collective Impact

**Common Agenda**

**Shared  
Measurement**

**Mutually Reinforcing  
Activities**

**Continuous  
Communication**

**Backbone  
Organization**

## Working in Collective Impact Requires a Mindset Shift

### Adaptive vs. Technical Problem Solving

- Allowing answers to come from within
- Supporting common agenda building, information sharing and coordination/alignment

### No Silver Bullets.... But we do have Silver Buckshot

- Many small changes implemented in alignment can add up to large scale progress

### Credibility vs. Credit

- Creating new incentives to work collaboratively vs. competitively

# Collective Impact in Health: Unique Challenges

## Competition

Payers, providers, and others often compete for patients and funding. These are the same groups needed to create a common agenda.

➔ *Partners can come together to define a problem and set a goal to solve that problem based on mutual benefits.*

## Sharing the Savings

Improved health leads to financial savings. Who accrues these saving, and how they are distributed, can be a source of tension among groups needed to align activities to achieve the common agenda.

➔ *These issues can be addressed up front by inclusion of various players (e.g., payers, providers, government, pharmaceutical companies) in creating a common agenda that speaks to individual interests.*

## Patient Privacy

Patient privacy laws (i.e., HIPPA) can prevent partners from sharing data. This data is necessary to track progress, set strategies, and learn.

➔ *Partners can share de-identified data, potentially via hospital councils or other data sharing entities*

# **The Role of Funders in Collective Impact**

# Taking a CI Approach Offers Funders the Opportunity to Amplify Impact, Leverage Funding, and Drive Alignment

## Amplify Impact

- ✓ Involves multiple partners working towards **long term, systemic change**
- ✓ Offers a **holistic approach** by channeling the energy of various stakeholders towards solving a problem
- ✓ Provides opportunities to **influence the system** from within and outside by coupling advocacy with action

## Increase Efficiency of Resources

- ✓ Allows **more efficient use of funding**, especially in times of scarce resources
- ✓ Enables **leveraging of public and private sources of funding**
- ✓ Opens channels for organizations to access **additional funding** against an issue

## Drive Alignment

- ✓ **Reduces duplication** of services
- ✓ **Increases** coordination
- ✓ Embeds the drive for sustained social change within the community, facilitating “**order for free**”

# Funders Can Engage in Collective Impact Efforts in a Number of Ways

Sample Funder Role	Description	Examples
<b>Catalyst</b>	<ul style="list-style-type: none"> <li>Funder initiates collective impact strategy as champion, financier, and convener, potentially playing a key role in attracting resources throughout the effort</li> </ul>	
<b>Backbone Organization</b>	<ul style="list-style-type: none"> <li>Funder organizes and coordinates the actions of cross-sector stakeholders to advance collective impact effort</li> </ul>	
<b>Participant</b>	<ul style="list-style-type: none"> <li>Funder actively participates in collective impact effort, and aligns funding and measurement to the effort</li> </ul>	

***Funders can play a wide range of roles in Collect Impact efforts, even within these categories***

# Key Success Factors for Funders in CI include Institutional Adaptability, Culture Shifts, and Long-Term Orientation

## Long-term Orientation

- Commitment to **achieving progress on a specific issue**, regardless of attribution vs. contribution
- **Understanding of timespan required for systemic change**, making a long-term commitment
- **Comfort with** measuring progress using **interim milestones and process measures**

## Culture Shift

- **Comfort with uncertainty and adaptability** required to engage with community and stakeholders
- Awareness of **shift in power dynamic** among funders, grantees, and other stakeholders
- **Openness to funding infrastructure**, which is often seen as less attractive than funding direct services or interventions

## Institutional Adaptability

- **Flexibility** to work outside of traditional grant cycles and established internal processes
- **Ability to be nimble** in pursuing opportunities as they arise, without being prescriptive about the outcome
- **Willingness to learn new skill sets** required – including partnering, facilitation, communication, community engagement, and convening

# Missouri Foundation for Health

## Targeted Initiatives

Childhood Obesity Prevention  
Expanding Coverage  
**Infant Mortality**  
Oral Health

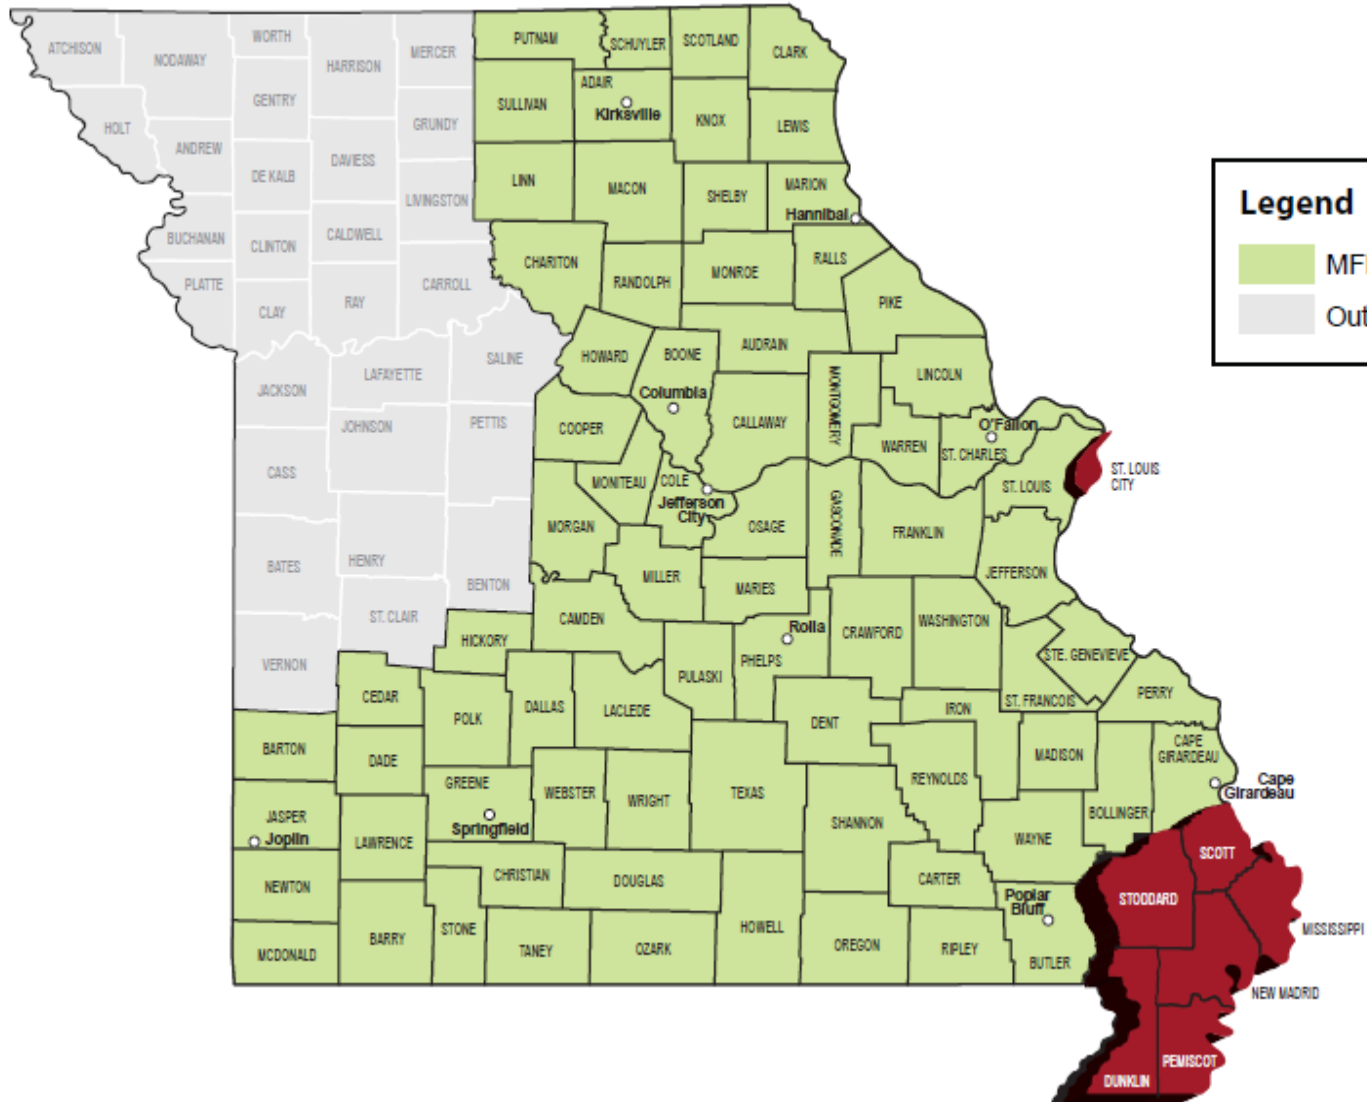

## Responsive Approaches

Opportunity Oriented  
Strengthening the Health Field

## Policy Approaches

Research and Education  
Building the Field of Advocates  
Community Government and Outreach

# Where We Are

## Infant Mortality Reduction Initiative

A place-based, comprehensive community effort to reduce infant mortality in the Bootheel and St. Louis City by mobilizing, facilitating, coordinating, and increasing engagement of multi-sector partners and community members.

### **Progress**

The three “backbone” organizations have met monthly with MFH staff to plan and implement the beginning phase of collaborative development. Quarterly convening of collaborative partners provide opportunity for shared learning and relationship building.

### **Currently**

Backbone organizations are recruiting community members to help ongoing collaborative development and creating action plans for next 12-18 months.

### **Upcoming**

Key drivers of infant mortality and potential solutions will be identified for each community and early implementation projects will be recommended in 2014.

# Planning and Development

## **Collective Impact Framework**

Infant mortality is a complex issue affected by a multitude of community factors without a clearly defined solution. Reducing infant mortality rates is a long-term goal and will require individual, community, and system level changes.

## **Backbone Organizations**

Maternal, Child and Family Health Coalition – St. Louis Effort  
Bootheel Network for Health Improvement and Missouri Bootheel Regional Consortium – Bootheel Effort

## **Role of the Foundation**

MFH has committed to significant funding for five years or more. Staff are engaged as supporters, capacity builders, thought partners, and co-learners.

# Initiative Elements

## **Developmental Evaluation (DE)**

An approach to evaluation that is designed to play an important role in complex social innovation, bringing insight, reflection, and data to the table in ways that participants can hear and use to guide their work. Spark Policy Institute and Tanya Beer partner to provide DE coaching.

## **Collaborative Learning Community**

Learning is a cornerstone of the initiative. The Verbena Group provides support to backbone organizations and the overall initiative to develop a learning agenda and create the infrastructure to support learning.

## **Advisors**

Currently, a local advisor provides support for MCH content and policy issues.

# Challenges and Successes

## **Communication**

Communication is complex given the number of people involved in the initiative

Need for strategic communications to assist with framing messages and providing a consistent voice across the initiative

## **New Roles**

Role shift for grantees from direct service providers to backbone organizations

Foundation as a partner requires shift for both the Foundation and grantees

## **Relationship Building**

Co-backbone structure in the Bootheel requires great deal of trust and communication

Joint convenings as an opportunity to build relationships across the initiative

# Discussion

## Goals of the Collective Impact Forum:

Create the **knowledge, networks and tools** that **accelerate the adoption and increase the rigor of collective impact**

### Activities

- Develop a **field-wide digital forum** to create and disseminate effective knowledge, tools and practices that support collective impact
- Support **communities of practice**, convenings and other events across the country that enable practitioners and funders of collective impact to increase their effectiveness
  - The first two communities of practice are for **funders** of collective impact, and collective impact **backbone organizations**

### Partners

### Co-Catalysts

## The Collective Impact Forum Provides Additional Resources on these Topics

The screenshot shows the homepage of the Collective Impact Forum. At the top, there is a navigation bar with the forum's logo, a search bar, and links for 'ABOUT US', 'PROFILE DIRECTORY', 'BLOG', 'MY PROFILE', and 'LOGOUT'. Below this is a teal header with categories: 'WHAT IS COLLECTIVE IMPACT', 'GETTING STARTED', 'FEATURED STORIES', 'COMMUNITY', and 'RESOURCES'. The main content area features a large 'Welcome to the COLLECTIVE IMPACT FORUM' section with a description of the forum as a network for sharing experience and knowledge. To the right, there is a 'Visit Our Community' section with buttons for 'FUNDER OF INITIATIVES', 'BACKBONE ORGANIZATION', and 'PARTNER ORGANIZATION'. Below the main content, there are two columns: 'Featured Resources' and 'Events'. The 'Featured Resources' column highlights a case study titled 'New York State Juvenile Justice: Progress Toward System Excellence'. The 'Events' column lists a 'Backbone Workshop' on April 01, 2014, with a description of its focus on guiding cross-sector groups.
