Place Matters

Infant Mortality Matters

Life Course Matters
WHERE YOU LIVE AFFECTS YOUR HEALTH

Disinvested Communities
- Limited/Unsafe Parks
- Crime/Violence
- Fast Food Restaurants
- Liquor Stores
- Poor Performing Schools
- Pollution and Toxic Exposures
- Limited Public Transportation
- Absence of High Quality Financial Institutions
- Predatory Lenders

Poor Health Status

Communities of Opportunity
- Parks
- Safe/Walkable Streets
- Grocery Stores
- Good Schools
- Clean Air
- Public Transportation
- Good Jobs
- Strong Local Businesses
- Financial Institutions

Good Health Status
A MOVEMENT: PLACE-BASED INITIATIVES
Each year, about 25,000 babies die before 1\textsuperscript{st} birthday

U.S. Rank in world: 27th-49th

Significant disparities
NATIONAL EFFORTS TO REDUCE INFANT MORTALITY
LIFE COURSE PERSPECTIVE

The Life Course Perspective is a way of looking at life, not as disconnected stages, but as an integrated continuum.

Life Course is a perspective that seeks to understand, explain, and improve health and disease patterns across population groups.
Life-Course Perspective

Program Initiative to Improve Infant Mortality

Place-Based Initiative
VISION

All babies are born healthy, into communities that enable them to thrive and reach their full potential

MISSION

To give every baby born in a Best Babies Zone the best chance in life
HOW WE PLAN TO GET THERE...

Work with communities with infrastructure already in place

Engage the support, expertise, and technical assistance of local, state, and national partners

Establish and build on existing community driven leadership and ownership to achieve community transformation
We engage community partners and residents to work together, bringing their voices and visions to transforming their community.

Achieving and sustaining success in a neighborhood zone requires the active participation of residents in the zone, as well as the support of local community organizations and the surrounding city.

Our integrated approach draws on opportunities and points of intersection in four interrelated areas that influence community health and birth outcomes: health services, early care and education, economic development and community systems.

Neighborhood residents, community organizations and national partners work together side by side to learn from and collaborate with each other.

Concentrating our efforts in a small neighborhood zone enables us to maximize our successes. By focusing our work in these zones, we can engage residents in aligning community assets and addressing multiple factors influencing birth outcomes and people’s health in the neighborhood.

A bold, outside-the-box approach is needed to improve birth outcomes and eliminate health disparities. We look at health from a broad perspective that goes beyond health services to encompass many social determinants and interrelated sectors of the community.

Innovation

Community Voice

We look at health from a broad perspective that goes beyond health services to encompass many social determinants and interrelated sectors of the community.

We engage community partners and residents to work together, bringing their voices and visions to transforming their community. Achieving and sustaining success in a neighborhood zone requires the active participation of residents in the zone, as well as the support of local community organizations and the surrounding city.

We look at health from a broad perspective that goes beyond health services to encompass many social determinants and interrelated sectors of the community.

Collaboration

Our integrated approach draws on opportunities and points of intersection in four interrelated areas that influence community health and birth outcomes: health services, early care and education, economic development and community systems.

Neighborhood residents, community organizations and national partners work together side by side to learn from and collaborate with each other.

Concentrated Effort

Concentrating our efforts in a small neighborhood zone enables us to maximize our successes.

By focusing our work in these zones, we can engage residents in aligning community assets and addressing multiple factors influencing birth outcomes and people’s health in the neighborhood.

Movement Building

Our intention is to foster fresh ideas in our pilot zones and use the most successful to build a model that can be replicated in communities across the country.

We aim to cultivate a broad-based, nationwide social movement to improve birth outcomes and health for all families.

Zone by zone our goal is community transformation.

How we do it

We are a catalyst and a convener, bringing together resources with community vision to foster neighborhood-led initiatives that link health services, early care and education, economic development and community systems.

The big idea

When it comes to reducing infant mortality, health means more than health care. Health is the product of one’s environment, opportunities and experiences. We believe that to address these interrelated conditions, a holistic, neighborhood-based approach is needed.

Our values

Community  Equity  Flexibility  Integrity  Optimism  Respect

WHAT ARE OUR STRATEGIES?

1. Identify a **defined geographic region** where change is greatly needed and resources are aligned to produce and measure impact.
2. Establish a broad collaborative to work across **four key sectors** – health, economics, education and community.
WHAT ARE OUR STRATEGIES?

3. Cultivate a public health social movement within each city to rally community action aimed at improving the social determinants of health, birth outcomes, and ultimately the quality of life overall in the zone.
THREE PILOT ZONES

- Oakland
- Castlemont
- Cincinnati
- Price Hill
- New Orleans
- Hollygrove
WHAT DOES SUCCESS LOOK LIKE?
LESSONS LEARNED …SO FAR…

• Listen to the community
• Build on community strengths and assets
• This type of work takes time
• Small, short term wins essential
• Balance momentum, community capacity, sustainability
• There isn’t one answer or approach
• Listen to the community
WHAT’S NEXT?

Using what we’ve learned from other sectors, zones, evaluation, etc to...

- Improve
- Sustain
- Scale
